The Refine Edge feature allows you to manipulate and edit the edges of elements on your image such as edges of a subject, text, or a logo. The Crop tool is useful for selecting a portion of your

---

image. You can then use the other features to edit or apply effects to that selected area. The Eraser tool allows you to edit objects or images on your computer by deleting or eliminating them from your project. The Draw tool allows you to add, modify, or remove layers within your document. Most of these tools work automatically. You

---

don't have to click any of the tools once you have them loaded on your computer. The order in which you use the tools doesn't matter. You don't have to select any tool before you apply any other tool. Just think of all the functions you can do with the tools on your computer. If you want to use more than just a single tool, such as the

---

Pick Tool, select the tool in the Tools panel. Next, select the tool you want to use by pressing the left mouse button over the tool. When you use the Edit Panel, you can highlight tools, colors, and settings, as well as a variety of other options. The next section covers how to make your own customized brushes and use the Brush
