Q: jquery mobile icon on top I have a jquery mobile web application. In this i am using various icons to highlight features for the user. i.e. a browser icon to provide links to the mobile browser and a tick to indicate that the application is running. I would like to have the browser logo stay on the top of the view rather than have it follow the content and only appear at the bottom of the view. I already have the CSS for the jquery mobile css file which i add this to the view i also have the icon image i would like to use the same tick image to indicate that the application is online. Is this possible? Thanks in advance. A: Yes, you just need to add the following class to the icon's parent element: class="ui-btn-icon-top ui-icon-check" The above class overrides the default alignment of the icon.
