The Detective, in this puzzle-platformer, must solve the murder of a beautiful woman using her own memories and experiences of the past. Complete the puzzles of the game using the memories stored in the player's hard-drive.

About The Game Writer: Shaun Ellis has enjoyed working in the video game industry for over 20 years. A firm believer in the "stories are everything" belief, Shaun started working as a writer for adventure games on the PC in 1995. Since then he has written for a variety of video game companies, including Interplay, Cyan, and The Advertising Project, has worked on projects that include The Search for Red October (which won several awards, including the IGF Award for Best Game and the Seumas McNally Grand Prize at the 1994 Game Developers Conference). Now, Shaun is bringing that unique writing style to Telltale Games and working on his debut game. He's also busy working with the Mindquest team on various projects.

About The Game Director: Paul Maybury has worked in the video game industry since 1984. He's worked on projects for companies like Cyan, Virgin, and Interplay, has

won the "best debut writer" award at the 1996 Game Developers Choice Awards, and has been nominated for industry awards like the IGF Award for Best Writing, the Interactive Achievement Award, and the Seumas McNally Grand Prize. Currently he's working on his first episodic game. About Interplay Entertainment Founded in 1988, Interplay Entertainment is one of the world's largest and most successful game development companies. From 1988 to 1995, Interplay produced the popular game modules Wasteland, Shadowrun, and Ultima Underworld, as well as many other early third-person action/adventure games, first-person shooters, sports games, and other genres. In 1996, Interplay formed Eidos Interactive. Eidos gained success with original titles such as Deus Ex, Thief, and System Shock, as well as the future blockbuster series, BioShock, Mirror's Edge, and a remake of Ultima VII. In 2003, Interplay formed Digital Extremes, a studio specializing in first-person shooter games, with titles such as Painkiller, Dead Space, and MX vs. ATV Untamed. In 2008, Interplay formed Reloaded Games, a game development company focused on narrative and interactive storytelling for use on the Internet, mobile platforms, PC, and consoles. At Digital Extremes, Reloaded Games was in charge of the development of the Story

### **Will this be released as classic, free or paid game?**

If this will be a game, I will be able to play both multiplayer and single player.

This is a 1st person shooter for PC, Xbox and PlayStation (PlayStation 4, PlayStation 3, PS Vita, PS2).

The Windows and Linux versions will be free to download and play. I will also release Mac version as part of a GOG universal app, which is free to download and play on your Mac too.

Unfortunately it is not for the PSP or any other handheld.

---

I will work with Sony for the PS3 and Xbox 360 versions, and with Microsoft for Windows.

The Switch version is a paid game.

My love for games inspired me to make the game, which is both a strategy and a strategy game combined. It is quite hard to explain in writing too because there are 2 sides to the game.

Subwar 2050 is a hybrid of two genres of the strategy game genre, the Suburbia and the Subwar. Subwar is the Infantry side of the strategy game and Suburbia is the Artillery side of the strategy game.

In the Suburbia side of the game, the player controls a faction with one of the 28 artillery pieces a faction has.

There are a couple of problems with this thing. For starters, there is a LOT of cut-scene footage, and this isn't because the Director's Cut involved more cut-scenes as most of you probably think. No, this was all cut-scene footage. About 70+ minutes worth of it, to be precise. This is also the biggest fault of the Director's Cut. You see, there were cut-scenes that were entirely new, but they were also of terrible quality and are almost unplayable due to the all too often soft focus which makes the environments look terribly fake and gives them that sort of "too unreal to be actually there" look. These include some of the interiors, which look like they were shot on a phone. The second problem with it is that while the whole of the opening sequence is new, the opening with Katherine is basically the same as the version that came out, so it's not exactly exciting. Also, the second opening, or sequence, with Agent Francis York Morgan on the plane was new, but was mostly a cut-scene again. But the primary problem was that half of the new stuff wasn't exciting. On the plus side, there were several new locations, such as this apartment, which looked really neat. But the ways that the locations are used were not the most exciting. There was also a new side-story, involving a drug dealer/alchemist, which looked rather interesting but was horribly short. On top of all of that, several of the new locations, and many of the old locations, are very poorly-done. While all of the locations don't necessarily fit into one category, the ones that fall into the "good" category are the three locations that involve the Kankrin ship. These were all location-based puzzles with limited time, and they were all extremely well-done. The other new location that was good was the first location in the "Jill-Jo: Battle Royale" DLC. Graphically, it's almost identical to the version that came out. The only thing that's really noticeable is that the cut-scenes that occurred in the Director's Cut look a bit better than they did in the original, which is a good thing. The only thing to note is that the cut-scenes were filtered, which is very noticeable when the screen turns black. It's a nice

**Taco: Why it's important to think about the basics 26Feb**

**Roguelike RPGs are extremely demanding games, especially when it comes to level design. Puzzles and challenge heavily influence every aspect of your progression — and almost everyone will run into challenges they can't overcome. In this post I'm going to take an in-depth look at the fundamentals that will guide you through some of the most common combat strategies and gameplay problems. The basics To begin with: in roguelikes, the enemies you're facing are not your buddies — they're your allies. They'll die if you get too many hits, and they're going to teach you a lesson if you get too many of their own. They can't fight back unless you tie them up somehow, whereas you can always attack as much as you want. They're going to drag you out of fights or bamboozle you if you're not careful. If they hit you hard enough, they can even drop you below 1 HP, making the next round dead. With these exceptions, they're here to fight alongside you and for your survival, so don't let them die and get angry! This means you'll have to deal with both melee and ranged attacks from a variety of enemies at once, and keep track of all of them as you move around your level. Arrows You'll be using bow and arrow to defend yourself, but all the varieties you can face include melee attacks with a big sword or axe. So, you'll likely have to protect yourself with a bow, too. Take a look at this combat screen: First of all, you may notice one or two different symbols (L, A, A+ L) at the top of the screen — these are enemy abilities you won't be able to dodge. In the case of the first two ones, they're either going to damage you or debuff your strength. Keep an eye on them. The L stands for poison arrows, which hurt you if you're hit, but for other enemies don't do anything. The A stands for an anemia attack: while it doesn't really damage you, it will debuff you. Don't be afraid to let your allies**
