**FIFA is a football (or soccer) video game series developed by EA Canada and published by Electronic Arts. Following the release of EA Sports FIFA 2001, EA created a new company to continue the franchise, which became EA Canada in 2002. FIFA is arguably the best selling video game franchise of all time, having sold more than 75 million units worldwide, with more than 65 million units sold in English speaking regions alone. However, in the United States, FIFA has not kept up with NBA 2K in terms of sales, having sold around 34 million units since the release of FIFA 06 on Windows PC and Xbox 360. Because of this, EA has decided to move the franchise to other platforms, with FIFA on the Switch coming first. On October 28, 2014, FIFA became the first video game in history to surpass the \$1 billion mark in revenue. Battle for the Ball The gameplay of FIFA has shifted greatly since the PS3 and Xbox 360 editions of FIFA 07. FIFA 09 featured a brand new presentation and gameplay style for every edition of the game. The addition of Maneuvering and Interference for attacking moves gave players a more realistic option in how they could win possession in the final moments of the game, in addition to the much needed OVR. Maneuvering, the ability to control the direction an on-ball defender moves within a 2D landscape of the game field, was given to attacking players and allowed for them to use the wall to either cut-off a defender, or beat them to the ball. Maneuvering also became valuable for defenders, as players could no longer use their opponent's movement to their advantage. Players that used this**

method were awarded for their defensive interference. Interference, the ability to use the wall to deny passes to a team mate, was also introduced to defenders. Interference was awarded for skilled defensive plays. Interference was a major change in FIFA, as it worked by enabling the player to form a wall with another player and prevent them from passing the ball by interfering with their pass. A player could wait for a teammate at the wall and block a pass, or they could rush the other player and force a pass. Whichever method they used, a defensive intervention was awarded to a player for their exceptional play. Maneuvering and Interference became vital changes in a game that used to play its course strictly according to the laws of physics. Players were able to cut-off defenders using the edges of their box
