Photoshop's features have been enhanced over the years. In most of the cases, the changes have made use easier and more powerful. However, I haven't been able to find a change that I really like; I still tend to use the features I had when I first started in Photoshop. Using Your Camera One of the first things you want to do when you use your digital camera is to set the white balance. The white balance setting is used to produce consistent colors of the image that you capture. For example, when you set the white balance in your camera to a fluorescent light setting, the image you take will have a slight color cast that makes the subject appear a bit green. Therefore, if you were to use that image for any kind of promotional material, the subject would look a bit sickly. Don't be scared to take the time to set your white balance settings; this setting impacts your image's appearance. However, your camera offers a variety of white balance settings, each of which can create a unique look for your images. After you set your camera's white balance setting, you're ready to take great pictures. As I mention earlier in the chapter, your camera may have a built-in flash, but most photos from your camera are in front of ample light. If you've taken a class on photography, you can create some great images in harsh light. You can also use a reflector to create the light you need on a variety of subjects. Another thing to keep in mind is that photographers usually choose to use the automatic white balance setting. Unfortunately, people who are used to taking pictures under fluorescent lighting find that their subjects turn out a bit green. Regardless of whether you use the auto white balance setting or set the white balance yourself, be sure to take some sample shots using your camera's various white balance settings. Enabling Auto Exposure One of the most basic tasks you can do with your camera is take a good picture. However, a good picture depends on several other factors as well. One of these is whether or not you're exposing the image correctly. You can either select the right camera settings for your particular camera or use your camera's automatic setting. However, if you expect a tough lighting situation, you may want to use a particular mode to allow the camera to make educated guesses about the exposure settings. Some digital cameras are better than others, and your camera is no different. Take a few test shots; either get

Tell the truth, though, and most people outside the world of professional wrestling would be surprised to hear that (as the wrestlers put it) the “women’s revolution” is really only about increasing the number of women who appear on a regular basis. They’re talented and skilled at this stuff, just like the men, and they’ve proven this time and time again. But that doesn’t mean women are going to be getting the same treatment by the WWE, which has become a male-focused enterprise and which still has a long way to go to acknowledge all women on equal footing. Even in the 1990’s, when women did have a stronger footing in the WWE, few were willing to acknowledge the genre’s real strength – which is in the “women’s wrestling” put together by women for women. Part of the cause of this is the TV ratings, which were going down in the 1990’s and haven’t gotten any better in the years since. In 2001, WWE featured only 11 matches with women on television. In 2011, they were on the air 24 hours a day, 7 days a week. They’ve been ramping up the number of women on their shows and in their magazines ever since, but that influx of talent didn’t translate to new TV ratings. They’re going to keep trying, but the efforts aren’t going to change things overnight. Not that there’s any reason for them to be any different – the men all want to make money, just like the women. It’s not like the women get more money for working in the ring, and they’re not the primary breadwinners for the company. They’re also not getting the same perks or the same protection. The point is, there’s really no reason that women should have an easier time making a living in the wrestling industry than men, or an easier time advancing their careers. Women are on a similar level with men in the industry, not behind them. We’re still a long way off from the day when WWE features as many women on TV as they do men. But when that day comes, fans will be clamoring for more episodes with the new crop of talented women they’re adding to their shows all the time.---

of the operation and more than three shifts per workday. "We think they have to do what we did," said Joe Mendez, a former union shop steward at Nydam, who filed the complaint against the company with OSHA. "We had to do it under federal law. No one else could do it because Nydam is the only manufacturer of heavy equipment in the state." The company declined to comment for this story. The Nevada OSHA office is conducting a broader investigation into Nydam's safety practices. Its conclusions could affect maintenance contracts with other companies. Nydam's machinery is well maintained, said Mendez, the former shop steward, but he said it could make the difference in a dangerous situation. "You could get hurt and you could really get hurt," he said. "They could be liable. It's a big decision they have to make." — This story was updated at 4:34 p.m. with a comment from Nydam Mobile, the parent company of Nydam.Q: Why isn't keyboard layout switching working for me? I recently had to change my keyboard layout. I've installed gdmflexiserver and set the layout to "de"; it's worked fine for months now. However, when I log in through GDM today, keyboard input is sent to the wrong application. I could solve the problem by rebooting into another user account, logging in there, and switching the layout back. Any idea why? A: You need to set the keyboard layout for your specific user or else it will not be remembered.

Bachelor in Paradise Season 2 Episode 5 We guess Season 1 didn’t get quite as much buzz as we’d expected...but we suppose that’s par for the course. One thing we can definitely say: it is definitely, definitely, definitely not the end of Bachelor Nation. In fact, it seems like the start of an even bigger, even more #blessed, generation of (Bachelor or Bachelorette, seriously, you’re not gonna get a sniff if you don’t

try for that vaunted crown) having to deal with emotionally invested groups of degenerates looking for love on various reality competition shows. “Brooke is in the supermarket, and she comes out and sees her dad, and she completely freaks out
