UNITED NATIONS (AP) — A U.N. peacekeeping mission is prepared to distribute food and humanitarian supplies in Yemen in response to reports of famine in the Arab country, the mission's deputy chief said Tuesday. U.N. aid officials have been in Yemen since March 26 to assess the situation, which deteriorated rapidly after Saudi Arabia and a number of its regional allies launched a coalition air campaign against Iranian-aligned rebels, according to U.N. spokesman Stephane Dujarric. ADVERTISEMENT "Once we have assessed the situation, based on the U.N. humanitarian response plan, we will be ready to provide humanitarian assistance, including food, as needed," Dujarric said. A previous U.N. statement made no mention of a famine, but said that it was too early to assess the situation. "While the U.N. has not officially declared famine in Yemen, some Yemeni humanitarian agencies have indicated there are

## **What's new in Legends Of Pindorama:**

**Now available for the PlayStation 3 and Xbox 360 Platforms by Joanna Reed, Brian Albert and Gregg Williams Can you hold the world in your hand? Yes, you could - if you were Amun, King of Thebes during the fourth dynasty. Your dynasty ended rather tragically for you: a thief carved the pharaoh's statue in two, shattering the country. Amun Rising, a new video game from Popcap and EA will let you reenact that fateful day, with the help of real actors. In the game's opening cinema scene, you enter the holy city of Luxor, host to the Pharaoh's great temple. Built by King Amenhotep III, the temple rests at the heart of the city, surrounded by heaps of rubble. The game's objective is simple: to climb to the top of the temple and find the king's statue of himself and the thief, cut it into two, and send it falling to the ground. Along the way, you'll come across several obstacles - giant cobras, poisonous grass and poisonous scorpions. If you get stranded or lost in the maze of ramps and steps, expect the player's character to grow more despondent and dour - so you'll want to keep careful track of her mood. Graphics-wise, Amun Rising is closer to a classic "Tetris"-type game than anything else we've seen in this current generation of consoles and PC gaming. Once you throw real rubble down on the screen, you'll see an animated sculpture of floating blocks. Temples, people and pieces of debris quickly fill the screen. The blocks fall so quickly and in such a way that they look more like pixelated animated wire frames than the kind of image we expect from today's hardware. The best part of Amun Rising is a level of interactivity - another tradition of Tetris - that it's closest to in the "Wild West" series. Falling blocks can be caught and tossed back to the top where they wait to be reused later in the level. Blocks can be tagged to make them go in the opposite direction from their current path. Flecks of blocky flowers that shoot out from beneath your feet give you the opportunity to use them to block your path, and can then be tossed back as well. **1. Field of the Invention** This invention relates to apparatus and method for transmitting communications and, more particularly, to a network-based device for transmitting messages through a communications system.

**2. Description of Related Art** Most modern electronic systems and devices, including a wide variety of communications systems, utilize binary numbers (i.e., bits) to represent the data. The bits can represent "0" or "1" in a binary code, typically varying in value from a high of "0" to a low of "1". A typical binary code can represent either a "0" or a "1" bit in a series of bits. As a result of the frequency use of binary numbers in many environments, the need to transmit binary
