THE LEGEND OF HEROES: HAJIMARI NO KISEKI - Advanced Medicine Set 2 Features Key:

Hoichi the Samurai: A young samurai, the young hero will have to tread hard on the path of the hero of the legend in a difficult journey.

Save the Old Man: The hero will first look after his sick dad then save his village by battling the ninja with its bear with an exquisite weapon.

Save the Legend: The final battle with the last ninja who is the master of Sake... and the bear that you'll need to defeat a challenge of a ninja too weak to kill you...

Achievements: Achievements included in this mission are in special boxes all over the map.

Hoichi the Samurai is a part of the "The Legend of Heroes" set 2 series. It's another fantastic action-RPG set in the Edo Period, a period that featured Japanese Ninja and Samurai warriors, and yet you will take places in an entirely different reality. The goal of playing this game is discovering the secret lore of the old man wandering on a road and the hero's path to save him, while being thrown among a series of bizarre events that leads to the final showdown with a ninja who is against the bear.

The new features of the game should already be a revolution in this genre, despite the lack of innovations. Hoichi can move in different directions using the Streetview feature, after having overcome a secret weakness (thankfully the code's already been logged). On top of that, the player has the opportunity to equip a sword in the attacks, a rope for traversing, and a magnetic pick that can attract items and break them with its magnetism. Finally, the old man can be broken into three lives, a feature that will lead to an interesting gameplay mechanic in the following missions.

For the next release, we also plan to work on the level design of the farm to make it more fun to use,

especially the treasure box, player can use pots to cook for example!

You are the hero
