A: This seems to do the job: `/*/*/*/*[self::default] [self::copyNode] /ancestor::node1/*` A couple of notes: I always find it a useful idea to check at any given time what the actual structure of a document is, i.e. in your case that it's a DAG. xpath 2.0 allows you to use the axis expression with respect to the XML namespace. So far, the axis expression does not support path variable names [1]. (This will change, though.) Whenever you need to select based on the position in the document, you probably need an axis. This is not the case with your data where you select based on a node name. As an aside: you've written the text you seek twice, which makes it a bit unclear what you really want to select. FILED

Customer Reviews deiphobe Jul 12, 2019 Teamviewer Crack is useful for sharing desktop, files, applications, and more between multiple users and computers. After adding a Teamviewer license key, Teamviewer then allows desktop monitoring and access by any devices on any platform. Modoc Jan 24, 2018 If you use Teamviewer, you should love it and install it. After visiting the website, you then download the full version of Teamviewer and enjoy using it for sharing files, hardware, and desktops remotely and in a secure manner. Jacob Feb 19, 2018 I have been watching lots of movies online recently, and every now and then, I run across a video that requires me to be in the room with the person who filmed the video. In those cases, I use the Teamviewer program to be able to log into their system and view the video. I like the fact that I can view what is happening on their computer screen. I can type messages, show them desktop pictures, and be able to quickly jump to other programs and run them. This is something I enjoy being able to do quickly. Marg Oct 22, 2017 The Teamviewer program that I use makes it easy to monitor programs that are running on someone else's computer. I can quickly view a movie or a business presentation that was recorded, and I can interact with it even if I'm not physically with the person who made it. Katherina Jun 6, 2018 I recently had to change my username on my computer because of a name change. My previous username was so long that I had to change it to something that wouldn't cause my pop-up blocker to run every time I tried to access a website. I looked for something that was a bit shorter, and tried to use this Teamviewer link. After doing so, I decided to log in to the site with my new username. I was pleased to see that it worked so well. I was able to login to the site without any problems. Jennifer Jul 22, 2017 I had a friend of mine create a video on a site that required that we view it together. The original URL had a long link, and was very hard to type in. The Teamviewer link was easier to type in, so I used it. It worked perfectly! It was quick and easy, and allowed me to view the video together
