Video Official Trailer GameplayAs a Humanities major, I struggle to keep my course selection broad and pertinent to my future career. It's a struggle that comes from both ends — I hope that I'm doing the readings and writing assignments that are guiding my academic growth, but also that I am choosing enough options that I can pick up relevant topics for career development. Since I'm a double major, that's a balance of course loads and professional development. That's why I love Humanities Year. Each of the links is a professional development tool, and they all add up to help me later in life. I'm able to make solid connections between the texts I'm reading and what I do in my career — and I'm able to set up solid connections for myself in my career in the future. The two databases to start with are Business Week Jobs and FastCompany Jobs. The Business Week Jobs provide links to current (and past) jobs posted by Fortune 500 companies — you can search by company and location. Traitors' have their own separate lobby with their own gameplay. • The moment you play, a new Trial will open and you will be presented with a screen that asks you to choose your role. • The majority of the roles are first come, first serve. Once the roles are chosen the game starts. • If you choose to be a Town member, then your role will be right there in the lobby. ### What's new in Variable:

**We got to know two of our co-authors here in our hosts' house—someone had to stay there and an ordinary roommate won't do it, do you dig? One of the guys actually developed a side business selling used towels. While apparently as filthy-comically-comical as the boys' living situation, the towels he was selling were much, much softer. If you're curious about all the stuff you'll see in the book, it seems a little too self-indulgent to call it merely a random snippet but in this case it would be fair. The book has two main heroes: Professor Horsehead, whom you might remember from aforementioned last week's blurb, and Kacha, a soldering iron whose name is the best Batman pun I've ever tweeted. (The authors also gave some of the villains I've mentioned here names. If the story ever gets made that should be the equivalent of using Nick Fury to swig Martinis in your MCU.) They were college roommates but as fate would have it they missed each other's lives excelerating as they did. They got close as a result of a secret society whose members thought they were making the world a better place by never using the term "Happy Days" anymore, ever. Mostly any day. Never was a good day. That's like being happy when you have a stomach ache and should be mad at someone but even the likelihood of blood is down. The villains of the tale include a new culture engineering company that's built a new culture, Sad Tiny Brain, that hates the Heroines who are essentially one of the twelve damned tribes and read society a book called The Heartland Girl; that's basically a book "by dick here," a 600-page primer on what it's like to be female in this time and place. Along the way, a Viking warrior named Erik gets drunk and tricks the (probably former band members of) The Roper Girls into rescuing his love child. The Sitar Girls, as they call themselves, are The Ginger Girls' great great aunts living in Spain. Here's an excerpt of some people's favorite part of the book. That's Erik's daughter, who'd like to follow in dad's footsteps**
