Gameplay. Take turns and make decisions. Those are some of the features one can expect from Kingdom Come: Deliverance in a nutshell. However, the turn based RPG game can be simplified. So why do I want to bring this game into the near future. You could simply conclude that it is my passion and want to create something new. But I have more reasons. Therefore, I'll talk a bit about the development process, how important requirements are and the development target. KINGDOM COME: DELIVERANCE In a nutshell: Kingdom Come: Deliverance is a hardcore RPG, that is entirely developed in house by the Just a few people: The game story is absolutely set in the medieval Central Europe from 1412 to 1433. Character role-play is the point of the whole game, because it shows us the game in a certain game style. In my opinion, in this type of game, the player can establish a specific role with his character. What these characters should be? Kneel at the moment, and if the game makes use of our character, you will be able to role-play the character. The goal of the game is to protect your character and its friends, and try to rescue the people from the castle of Salzburg, the strongest and most difficult objective in the game. It's not only about the gameplay, but we want to recreate the world of the Middle Ages. Particularly the realism and the atmosphere of the times, should provide players with a strong impression. Character role-play is one of the pillars of the game, that you have to give your own. We wanted to do it in a single-player manner. So every player could enjoy the adventure of one character. We will try to tell a story about a small character. In a single-player experience, you can create a character with his own view, and get into the story with the character in which you want to play. The biggest problem is, that a big number of fantasy games are ported to the current computer technology. While here, people play the game with their smartphones, I want the game to be on the PC. A big change like this requires a lot of work and design creativity, but I think that it can be handled. PC is used everywhere in the modern world, whether it is on the coffee table or in the

What's new in Beyond Eden Digital Artbook:

My name is Jennifer. I am a 31-year-old single woman. The last 15 years of my life have been very difficult, as anyone who has loved and lost will tell you. My present life has taken on a significant new turn about a month ago, when I was seeing my gynecologist for routine gynecological exams; I was on my second or third visit. My gynecologist noticed a small pocket of fluid in my abdominal area. He tapped it with his gloved finger and the fluid gushed out. There was a small, tacky patch (about the size of a quarter) of blood and discharge on his finger, and it felt like the deep red inside of a grapefruit. He wrote on the chart, "Grapefruit size," and then reached in to try to squeeze more fluid out of it. That's when he told me that he had found a mass in my uterus. "It's benign," he said, "but it's malignant. It's cancer. It's grade three, which is bad, and it's likely inoperable." In the following moments, I remembered the many people I have lost to cancer (including my own father), and the very real possibility that I too might someday turn up on someone's chart with a diagnosis of that dreaded disease. I have experienced "pre-cancer" ("those are the years right before the descent into

death”) for the first time in my life. So this is what I am feeling: Scared that I will soon be diagnosed with cancer. Scared that this is how my future is going to unfold. Scared that this is my life. I was told not to get distressed, as my options for treatment were good. I have insurance, and I am a good candidate for chemotherapy. I have just returned from my radiation treatment, though, and I am truly horrified with the experience I just had. I went to my first appointment with a man named Dr. X, whom my newly-acquired oncologist (Dr. O) recommended. Dr. X is a distinguished gentleman of white hair and a well-tailored suit. He uses very calming language, comforting even. He was very gentle, a large part of my comfort being that I am terrified of physicians
