The table structure for both the table are same like : TABLE1 TABLENAME COLUMNNAME TABLE2 TABLENAME COLUMNNAME I want to get the data type for the COLUMNNAME in TABLE1 and TABLE2 and compare.If COLUMNNAME has different data type in TABLE1 and TABLE2,I want to do some query on this field which has a different data type. I've already figured out how to get data type for a specific table and datatype for a column in database using these links [Get Column data type of table](#) [Get Data type of column in Database](#) But I want to get the data type of a specific table only. And also how can I get the value in that column for a specific table? `SELECT * FROM TABLE1;` This is what I'm able to get. Is there any other query which can return the specific table name in database? Is it possible to get query result with tablename and datatype from which column in a table? A: I think I have the answer. Query for getting column type of a specific table `SELECT COLUMNNAME, DATA_TYPE FROM INFORMATION_SCHEMA.COLUMNS WHERE TABLE_NAME = 'TABLE_NAME';` Query for getting column value of a specific table `SELECT COLUMNNAME FROM INFORMATION_SCHEMA.COLUMNS WHERE TABLE_NAME = 'TABLE_`
