fjepi. Site: Wikio :: Frédéric Boid. Do you agree with this lens?: What happened is that the lens is not compatible with the camera model; hence, you cannot use the lens. Mijikai ema len. This disclosure relates to an acceleration-sensing device, in particular a linear acceleration-sensing device. The following discussion of related art is provided to assist the reader in understanding the advantages of the invention, and is not to be construed as an admission that this related art is prior art to this invention. An acceleration sensor for sensing accelerations, e.g. linear accelerations, in one direction (for example in the longitudinal direction of a motor vehicle) is known from U.S. Pat. No. 6,678,430 B2. The acceleration sensor includes a pair of sensor coils, a first sensor coil being coupled to a first mass element in a first direction. The first sensor coil has a first resonant frequency, the first sensor coil being excited by an oscillating signal that is provided by a micro-electromechanical system (MEMS) capacitive element. The acceleration sensor further includes a second sensor coil that is coupled to a second mass element in the first direction, the second mass element being arranged coaxially to the first mass element, the second sensor coil being excited by the oscillating signal. A further acceleration sensor for sensing accelerations in a second direction (for example a lateral direction with respect to a motor vehicle) in which a first acceleration is detected and a second acceleration is detected using the different sensor coils is also known from U.S. Pat. No. 6,678,430 B2. The accelerations are sensed in the second direction using the different sensor coils of the two acceleration sensors. The above-described acceleration sensor is constructed using multiple coil sets. Each coil set includes a first sensor coil and a second sensor coil arranged coaxially to the first sensor coil. The acceleration sensor further includes a first mass element and a second mass element arranged coaxially to the first sensor coil and the second sensor coil. The first and second mass elements are arranged such that the first and second mass elements are elastically coupled with the first and second sensor coils, respectively. The first and second mass elements are configured to detect an acceleration acting in the first direction. The first and second mass elements are configured to detect an acceleration acting in the second direction. Sensing the acceleration in the first and second direction using different 6d1f23a050
